GLOBAL SPECIALTY BIOCIDES DIRECTORY

Our publication on global speciality Biocides directory proved an extremely popular information source when introduced in 2006. The directory details information on over 3,500 specialty Biocides. It is arranged in sections and includes cross referencing of Biocide active ingredients, suppliers and applications.

Due to current legislation and environmental pressures, we have created a new updated global speciality Biocides directory, encompassing the broad spectrum of industrial applications. The publication is mainly accessed by purchasers of Biocides.

The type of information provided in the global specialty Biocides directory include: Biocide Trade Name, Active Ingredient(s), Product Description (Liquid / Powder, Typical Formulations), End-use Applications, Suppliers Name & Contact Details.

If you would like to discuss this directory, please do not hesitate to contact us on info@biocide-information.com
